SERVICE, EDUCATION AND MORE

N95 PROTECTION, DESIGNED FOR CONNECTION

The P.Air Clear is the World's First NIOSH Approved N95 Respirator
With Transparent Window

ON THE
SAFE SIDE

The **p.air clear** is the first **NIOSH-approved N95 respirator with a transparent window**, eliminates the communication barrier posed by traditional masks.

This is an important breakthrough for healthcare workers, educators, students, geriatrics and the deaf and hard of hearing population.

Say it with a smile

A smile is incredibly important in personal communication. It conveys friendliness, warmth, and sincerity – all of which can make customers or patients feel more satisfied and likely to return in the future.

Traditional N95 masks obstruct the face, making nonverbal communication almost impossible. The **p.air clear** with its transparent window makes it possible for all workers to demonstrate their commitment to the recipient.

SUPPORT COMMUNICATION AND ENHANCE PATIENT AND PROVIDER SATISFACTION WITH THE P.AIR CLEAR N95 RESPIRATOR

The majority of our communication is non-verbal. We rely on facial cues to convey emotion, build trust, enhance comprehension and build relationships. The **p.air clear** N95 respirator ensures superior protection, without detracting from what matters most.

Establish trust, convey empathy and demonstrate compassion during difficult times or when patients feel vulnerable, isolated or afraid. Even facilitate lip-reading with deaf and hard-of-hearing patients or students while still being protected well.

Decrease the chance of miscommunication and ensure recipients understand your messages.

Swiss-made with the highest quality material for comfort and function, the **p.air clear** features a transparent window, a latex-free head harness and an adjustable nose clip.

The challenge with traditional N95 respirators is that they hide facial expressions that relay essential non-verbal information. This makes communication especially difficult for people with cognitive or hearing impairments. As a speech and language pathologist working with elderly dementia patients, I've found that the p.air clear respirator eliminates these challenges. Aside from being able to read my lips and facial expressions, my smile helps to put patients at ease when we work together."—Kristen Smith, MS, CCC-SLP

Optrel is a leading manufacturer of innovative occupational safety protection for the industrial and healthcare markets. The company focuses on providing workers with the most advanced technology in eye protection and respiratory health. For nearly 30 years, Optrel has challenged convention by creating personal protective equipment that prioritizes safety while increasing productivity and job satisfaction. Optrel AG is headquartered in Wattwil, Switzerland with its North American operations, Optrel, Inc., based in East Greenwich, Rhode Island, USA
