SWISS AIR PROTECTIVE COVER

DESCRIPTION

Waterproof and dustproof protective cover. The function is guaranteed by a coarse mesh air inlet. The cover can be opened for filter change and battery replacement. Easy and quick to put on

WORKING AREA

- Working in the rain is possible and approved by optrel
- During dust-intensive work, the device is protected from contamination

ADDED VALUE

Permanently protected, prevention of occupational respiratory diseases, better quality of life, a better working day even in the rain.

MOUNTING

1

- Initial situation
- Protection cover
 - Blower
 - Hose clip
 - Hose
 - Carrying unit

2

- Put the protection cover over the blower like on the picture

3

- Push the blower all the way in until it is completely inside the cover.

- 4 Insert the hose into the opening.

- 5 Insert the hose into the opening of the blower. Just like when you use the device without a cover.

- 6 Push the hose all the way into the opening and fix it with the Hose clip. Check that the sealing is mounted.

7

Roll the upper part of the filter cover 3 times around the width of the black border.

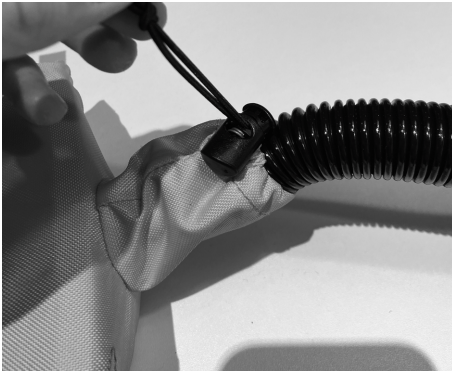

8

9

Fasten the rolled up upper part with the locking clips on the side

10

Seal the edge at the hose with the elastic to prevent water/dirt from getting in.

11

12

Reattach the swiss air to the carrying unit

13

And the swiss air is ready for work again!

Note:

It is not possible to use the control panel with the protection cover.

REMOVAL

1

First remove the support unit from the blower.

2

Loosen the elastic band on the hose

3

Open the retaining clips on the side of the cover

4

Now open the hose clip to remove the hose

The cover can then be easily removed.
